## objective

I'm looking for opportunities to learn and grow my strategic and analytical skills and understanding. My current experience embodies both strategic and data-oriented success, yet most of this experience exists on the small scale. Engaging in a program at a more-established company, with the guidance of knowledgeable mentors and the drive to push innovative fronts, would allow me to further develop these skills. My hope is to have the opportunity to learn and work with a collaborative and diverse team to solve complex business problems and to provide a measurable impact with my efforts.
